DETAILED ACTION

1. Applicant's amendment filed in Paper No. 9 is acknowledged. Claims 1-18 has been canceled. Claims 19-26 have been added. The newly submitted claims have been thoroughly reviewed. However, the newly submitted claims 19-26 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Newly submitted claims 19-26 are drawn to a an isolated polynucleotide having the polynucleotide sequence set forth in Fig. 5 (SEQ ID NO: 5), a fragment or a derivative thereof. The newly submitted claims 19-26 are patentably distinct from the previously examined claim 2 in that the previously examined claim 2 was drawn to an isolated polynucleotide having the polynucleotide sequence set forth in Figure 1 (SEQ ID NO: 16). A review of the specification has revealed that SEQ ID NO: 5 nor the polynucleotide sequence depicted in Figure 5 is related to or is identical to the polynucleotide sequence depicted in Figure 1 or the sequence of SEQ ID NO: 16. Therefore, the newly submitted claims 19-26 have a different inventive entity from the previously examined claim 2 and require a different field of search.
2. Since Applicant has received an action on the merit for the originally present invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly claims 19-26 have been withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP 821.03.
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cynthia B. Wilder, Ph.D. whose telephone number is (703) 305-1680.
